NOTES AND METHOD

Energy result. Energy revenue less energy costs for the period, ex-VAT, at the best grade present: sum of revenue facts - sum of cost facts.
Revenue. Energy revenue for the period, ex-VAT: sum of revenue facts.
Cost. Energy costs for the period, ex-VAT: sum of cost facts.
VAT. VAT on the period’s documents, beside the ex-VAT result: sum of VAT on facts.
Grades present: Settled.
Data completeness: 2 of 14 value streams have facts this month.
Check passed: Streams add up to the energy result. sum of streams R 69,135.90 = result R 69,135.90.
Method: Each value stream counts once, at its best grade (Invoiced, then Settled, then Estimated). Estimated losses are listed apart and never added to the result.
