Wheeling Charges and Losses

OffTaker C • 4 physical contracts

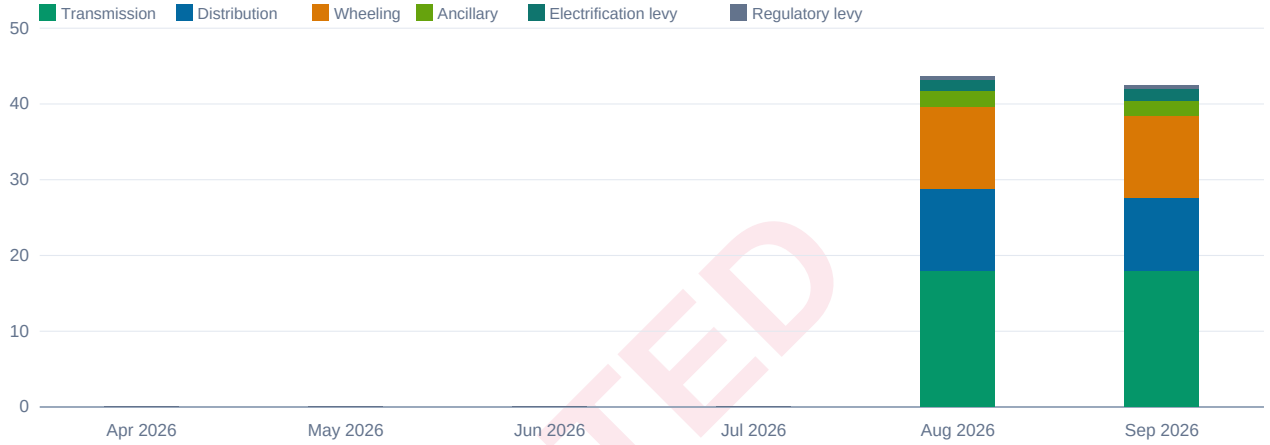
Sep 2026

Prepared for OffTaker C

Wheeling 99.3 MWh across Eskom Transmission and Municipality cost R 42,155 in Sep 2026 (42.5 c/kWh). Losses were 6.0% (6,336 kWh, worth about R 5,396 at your energy price). Every non-bypassable levy was charged.

NETWORK CHARGES	LOSSES	VALUE OF LOSSES	NETWORK OPERATORS	LEVY CHECK
R 42,155	6.0%	R 5,396	2	7 of 7
R 42,155.27 • 42.5 c/kWh	6,336 kWh	At 85.2 c/kWh	Eskom Transmission, Muni	Periods charged every non

Network charges fell 3% to 42.5 c/kWh.



Network path by contract

CONTRACT	PATH	LOSS FACTOR	LOSSES	TRANSMISSI	DISTRIBUTION	OTHER	CHARGES
PPPA-202610-737899	Both eskom	6.0%	68 kWh	18.00 c/k	0.00 c/kWh	4.00 c/kWh	R 234.42

EXCEPTIONS AND NEXT STEPS

Nothing needs your attention for this period.

NOTES AND METHOD

Method: Charges are your own settlement lines in the network categories on settled periods, whichever side of the contract you are on. A charge's operator is the network party paid the same amount on the same period. Losses are the settlement's losses against delivered energy; their value uses your average energy price for the month. Each rate is checked against the published network rate table and its effective dates, and every period against the levy conservation rule (each non-bypassable levy charged).
